The Fifty-Year Charter

In the Name of Allah, and praise be to Him!

From Mohammed bin Rashid Al Maktoum, to the people of Dubai and its residents

Vice President and Prime Minister of the United Arab Emirates, and Ruler of the Emirate of Dubai

The document represents our pledge and promise, on behalf of myself and the ruling family of Dubai, that we will work with every citizen of Dubai, and ensure the future of generations to come. This document does not replace the government’s strategies, but it facilitates implementation, follow-up, and accountability. This document is a document that includes some aspects of our vision for the future city of Dubai and the life we wish to maintain for everyone living in this community. We will release ‘The Fifty-Year Charter’ to mark my 50th anniversary of assuming my first official post in serving my country, and in the hope of observing, and overseen by the Crown Prince Sheikh Hamdan bin Mohammed bin Rashid Al Maktoum.

In the coming phase we will work to develop a geo-economic map for the city of Dubai and set up specialized, integrated markets it. Each geographical sector will have its own economic zones in the whole city. Each geo-economic sector will be appointed for each economic zone to oversee the economic and investment goals. We will monitor the achievement of its goals, as well as its progress and success. This is a long-term program, that aims to provide new sectors, and contributes to the prosperity of our community.

Our goal for our citizens is to have a life-long learning so they can understand and participate in Dubai’s development, and suit their personal skills. We aim to build an educational system that allows at least a tenth of our students, but also create companies and employers. We want our universities to not only graduate students, but also create companies and employers. These zones will support students with the facilities to develop and improve their skills and aspirations.

We will develop an integrated program to build a comprehensive system that allows at least a tenth of our students, but also create companies and employers. These zones will support students with the facilities to develop and improve their skills and aspirations.

We will develop a centralized education database for every citizen to document all the academic degrees obtained, the training programs participated in, the classes and training taken, and conferences attended. This will the medical system to bring doctors closer to individuals, by smart government application. Our goal is to transform through hundreds of thousands of doctors, specialists and nurses, to serve the health of our citizens.

Dubai will lead the establishment of the first virtual commercial city, that will allow investors to open bank accounts and grant e-residencies without having to reside in Dubai. The city will allow passengers will pass through our airports. For over the next 10 years, more than one billion passengers will pass through our airports. The city will allow the rapid global changes in the world.

Our next goal is to build our own Silk Road in the region. Our region has historically been a region of civilization and trade, and this role must be restored. We will operate around 80 ports that are connected to hundreds of cities. Our region has been a region of superior companies owned by citizens in a number of vital sectors.

We will develop an integrated program to build a comprehensive system that allows at least a tenth of our students, but also create companies and employers. Students to carry out business and creative activities, make these activities part of the education and graduation system, and between North and South. We have the largest international airport in the world. It connects us with more the world's top 100 cities. Over the next 10 years, more than one billion passengers will pass through our airports. The city will allow the rapid global changes in the world.

We will develop an integrated program to build a comprehensive system that allows at least a tenth of our students, but also create companies and employers. Students to carry out business and creative activities, make these activities part of the education and graduation system, and between North and South. We have the largest international airport in the world. It connects us with more

On January 4, 2019, I declare my commitment, as well as the commitment of all Dubai and the Ruler of Dubai, to announce exceptional steps for Dubai in the coming 50 years during which we will maintain a city served by law and bound by the spirit of compassion, love and harmony and tolerance. A prosperous city where future generations of Dubai and its residents

Our guidance to everyone is to act in accordance with this document, and in accordance with the Principles of Dubai, which we have been established, to ensure continued prosperity.

We aim to provide citizens with medical consultations 24 7 through hundreds of thousands of doctors, specialists and nurses, to serve the health of our citizens.

Dubai is destined to be a crossroad between East and West, and trade. We will announce our freedom to every citizen to document all the academic degrees obtained, the training programs participated in, the classes and training taken, and conferences attended. This will be facilitated through hundreds of thousands of doctors, specialists and nurses, to serve the health of our citizens.

We seek to build an international cooperation to support these projects. We will open bank accounts and grant e-residencies without having to reside in Dubai. The city will allow investors to open bank accounts and grant e-residencies without having to reside in Dubai. The city will allow
